

## MADISON MATH CIRCLE

# A Free Outreach Program Run by the UW Math Department

**More Info at:** [math.wisc.edu/wiki/index.php/Madison\\_Math\\_Circle](http://math.wisc.edu/wiki/index.php/Madison_Math_Circle)

A common perception is that most mathematical questions were settled hundreds of years ago. In fact, new discoveries are constantly being made in mathematics, just like in science and medicine. We engage students in this creative side of mathematics through an **interactive session** facilitated by a research mathematician. Topics vary according to the expertise of the speaker, past examples include game theory, prime numbers, and encryption. **Any middle school student is welcome!**

- We meet **Mondays from 6-7pm** in 3255 Helen C. White Library on the UW-Madison campus.
- Sign up for our mailing list to get weekly reminders and updates.
- **Pizza** provided each meeting!

Email graduate organizer Caitlyn Booms ([cbooms@wisc.edu](mailto:cbooms@wisc.edu)) with any questions!
