

MADISON MATH CIRCLE

A Free Outreach
Program Run by
the UW Math
Department

More Info at: math.wisc.edu/mathcircle

New discoveries are constantly being made in mathematics, just like in science and medicine. We engage students in this creative side of math through **interactive sessions** facilitated by research mathematicians. Topics vary according to the expertise of the speaker; past examples include plasma and weather in outer space, the geometry of soap bubbles, and the mathematics of juggling! **Any student is welcome!**

- Weekly meetings on most **Mondays from 6-7pm** in 3255 Helen C. White Library on the UW-Madison campus (See schedule on website).
- Sign up for our mailing list to get weekly reminders and updates.
- **Free Pizza** provided each meeting!

Email graduate organizer Karan Srivastava (ksrivastava4@wisc.edu) with any questions!
